

VacUp

The Conco VacUp is a vacuum lifter powered by an air blower. It is ideal for bags and boxes, both porous and non-porous. The VacUp performs well as a simple economic lifter for a variety of items.

Standard Features:

- Heavy duty construction for a long life
- A minimum of 6' lift
- 360° continuous rotation around the vertical axis
- No adjustments required to lift various weights
- Choice of standard foot attachment: Round Foot or Bag Foot

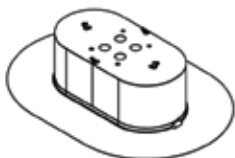

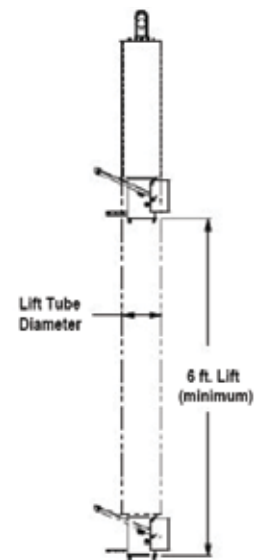

Available Options:

- Mounting Options: single arm jib crane, articulated jib crane or overhead bridge crane
- Multiple foot attachments for various applications are available
- Special sound enclosures to quiet the blower system in the work cell
- In-Line Filter System
